

Objectives

Objectives

- **Objectives:** Objectives are the measurable outcomes of the program. Your objectives must be tangible, specific, concrete, measurable, and achievable in a specified time period.
- Each objective will have an action statement.

Example of a Poor Objective

- Objective: I propose to collaborate with an existing community center called Shubbak to create a basic literacy program where the students will be helped to read and write better.

Example of a Good Objective

- Objective: Upon successful completion of this three month program, it will assist 100 children to improve their reading and writing scores by one grade level. This will be demonstrated by standardized reading and writing tests administered by the Egyptian Ministry of Education.
